

History

Intent

The purpose of our History curriculum is to develop a deep chronological understanding of the past and its ongoing influence on the present and future.

We aim to cultivate critical thinking, analytical skills and an appreciation for the diverse range of people and events that have shaped human civilisation.

Our program is designed to encourage students to explore and curiously enquire about historical events, figures and movements so that they understand their own place in the world and their connection to human development over time. It is important to us that our children learn about key periods of time through the relevance of their locality here in Warrington.

Implementation

To achieve this intent, we offer a broad and inclusive curriculum that covers a wide range of historical periods, regions and themes spanning from prehistoric times to present day. This wide array seeks to provide children with a comprehensive understanding of the events that led to life today.

Understanding the importance of sequencing and building on prior knowledge, Early Years and Key Stage 1 topics begin by focussing on events *within* children's living memory. This helps our children to create links with their own understanding of the world we live in start off their historical schemas. Students will then build on this as they look at events *beyond* their living memory as well as significant events, people and places within our local history. Moving into Key Stage 2, children begin by looking at Prehistory and the civilisations that followed this time. Sequencing events in this way provides children with a historical narrative so that they can chronologically paint a picture of the past within their minds.

During lessons, teachers constantly refer to prior learning to help with this aspect of chronology. To support this, all classrooms display a historical timeline with key events and figures signposted; topics from each year group are labelled with an arrow to help children contextualise the timing of an event with respect to present day and any previous events that they have covered.

Technology is used to help bring History to life. Children will use the internet to independently research historical events and find sources that deepen their understanding. Moreover, our ClassVR headsets allow our students to 'travel back in time' and experience History like never before! Children visit settlements that no longer exist, stand in the centre of a historical event as it happens and wander around sites around the world.

Impact

At Bruche, we expect students to develop a deep understanding of history and its relevance to their lives and the world around them. They will gain the ability to think critically about historical narratives and assess the credibility of sources. Our History curriculum aims to produce informed, thoughtful individuals who are capable of engaging in local life with a deep understanding of the past and its implications for the future. Ultimately, we hope to inspire students to be lifelong learners and active participants in the ongoing process of historical inquiry and understanding, contributing to a more informed and just society.
